Logical operators & control flow

Exercise 4

slido.com
jhuintprog01 ← zero

Exercise 3-A

- clone your private github repo
  tip: if you are authenticating using a personal access token:

  git config --global credential.helper store

- all of your work on exercises & individual homeworks will be here
- don't forget to add/commit/push regularly!
- submission workflow (zip, scp/pscp to download zipfile)

Exercise 3-B

- clone the course's public repo
- starter code will be made available here (don't forget to
  git pull regularly)

- copying starter code, editing, compiling
